We Connect Stakeholders In The Healthcare Sector

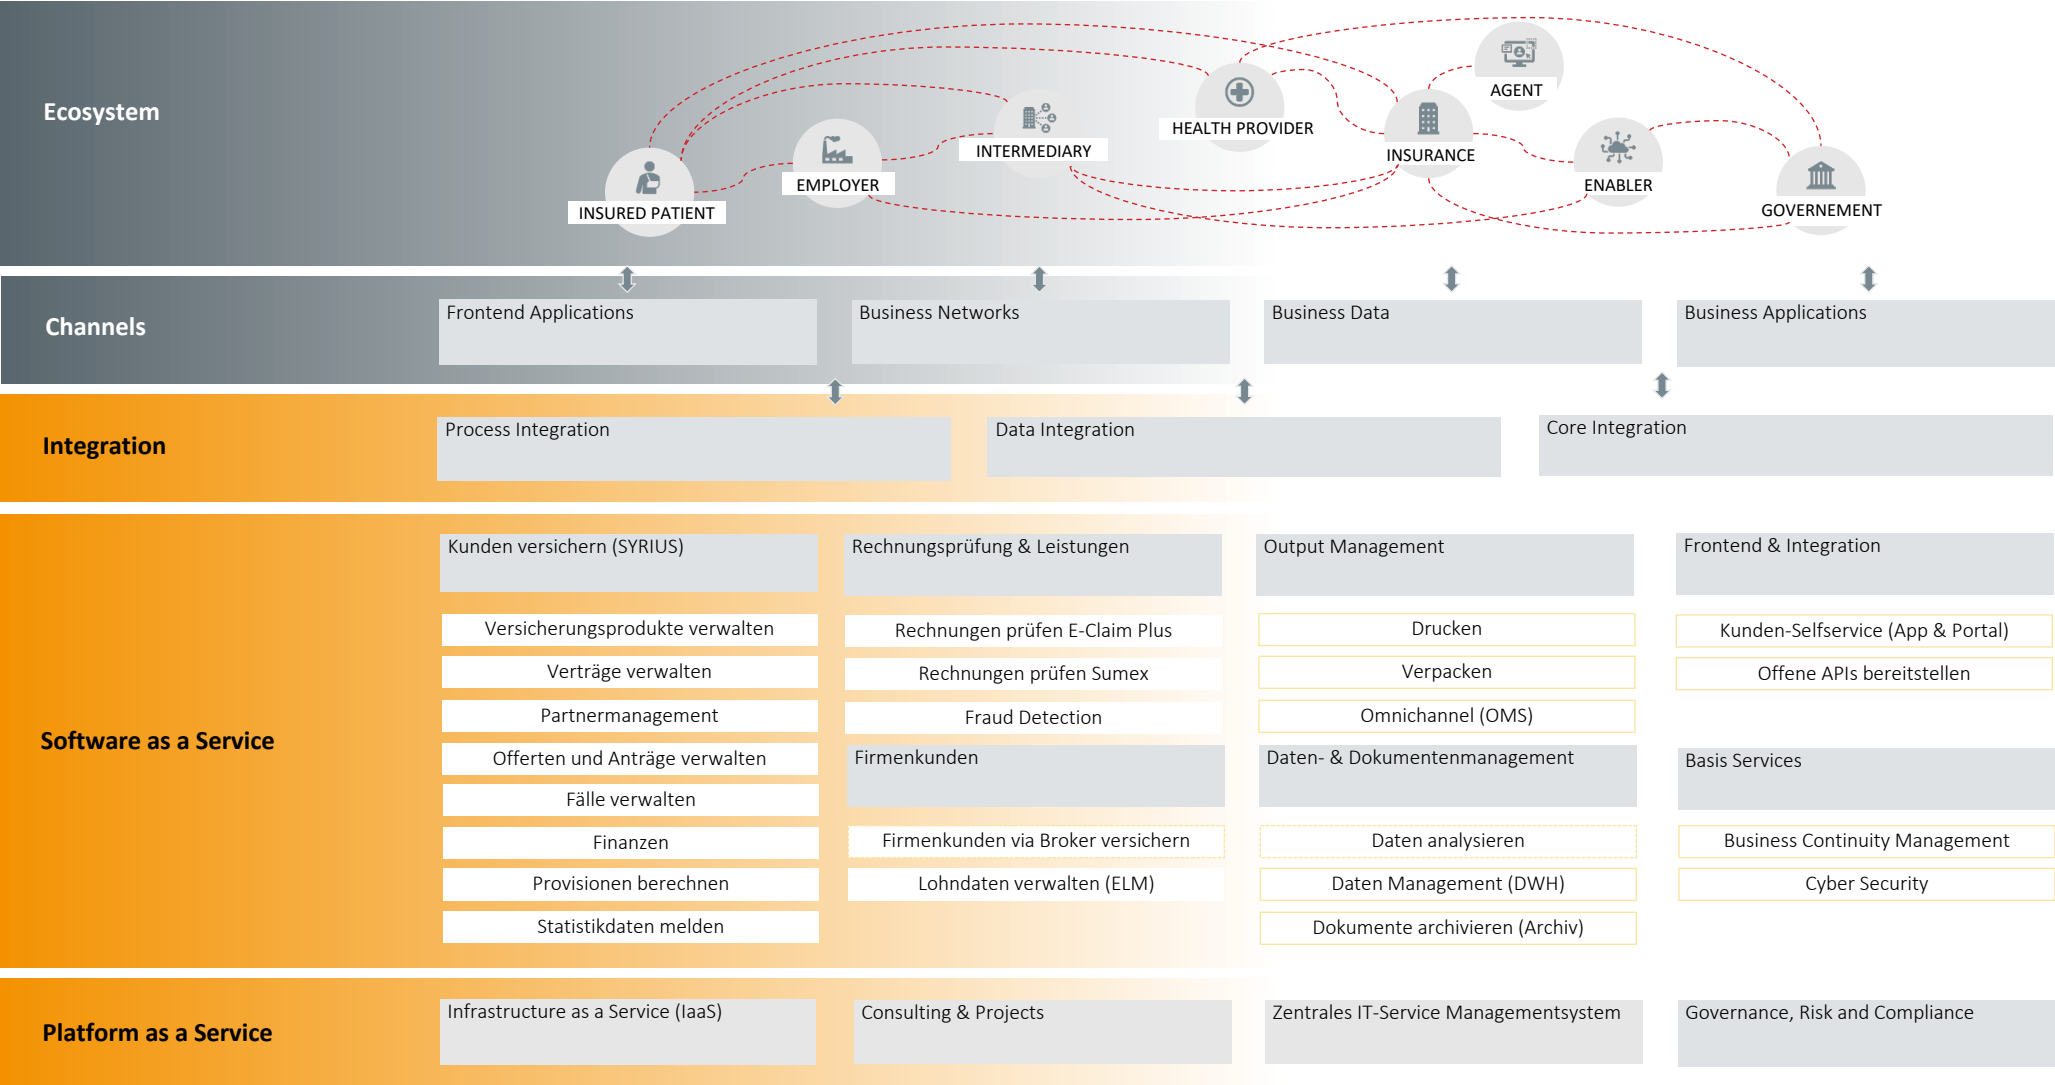

Centris uses an **open, cloud-based platform** to connect the various stakeholders in the Swiss healthcare sector and support the **digital transformation** of health and accident insurers.

At the core of the offering is the **Swiss Health Platform (SHP)**, providing a multitude of business services.

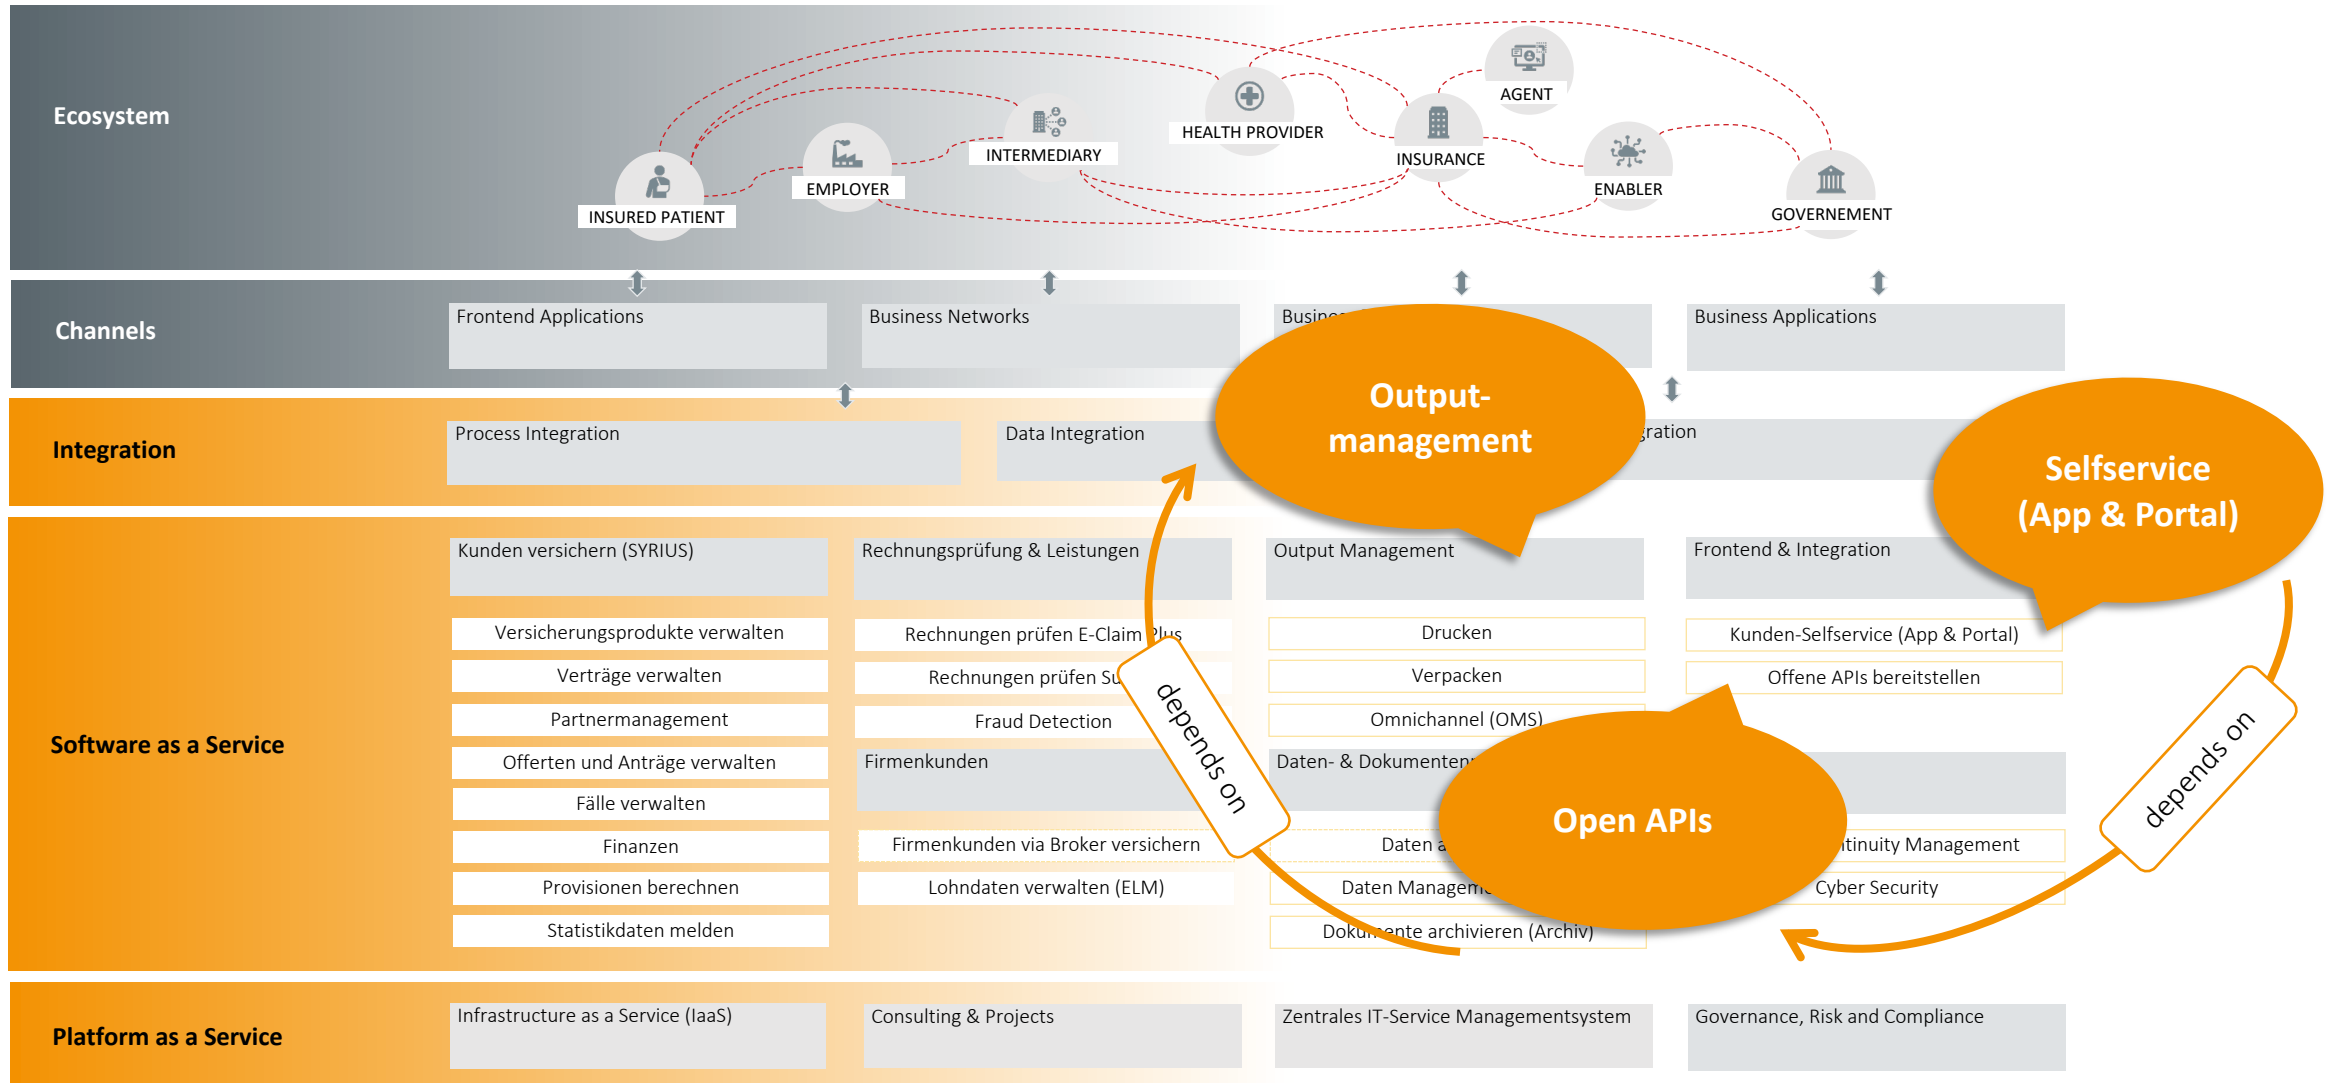

From design to operation, **customers can rely** on the **expertise** of our experienced consulting teams.

The Swiss Health Platform

What Is Next?

- Customizations, especially labels
- Using tags for special attributes
- Notification integration
- Improve navigation

What Is Next For Developers?

- Workflows for standard 2nd day use cases
- Monitoring and Logging views

What Is Next For Product Owners?

- Workflows for product deployment use cases

Does It Work?

Goals for clients (& developers)

- ✓ Transparency over environments and products
- ✓ Centralized documentation
- ✓ Installation state of components
- ✓ Quality gates of components

Goals for developers

- ✓ Single glass of view for components
- ✓ Overview over quality and vulnerabilities
- ✓ Team organization and component ownership
- ✗ Workflows for 2nd day and deployment use cases

Thank you!
