

# Hoşgeldiniz

# Red Hat named to Fast Company's annual list of the World's Most Innovative Companies

Our list of the Most Innovative Companies offers both a comprehensive look at innovation today and a playbook for the future. This year, we recognize **companies that are harnessing AI in deep and meaningful ways**, brands that are turning customers into superfans by overdelivering for them, and challengers that are introducing bold ideas and vital competition to their industries. At a time when the world is rapidly shifting, these companies are charting the way forward."

---

Brendan Vaughan  
Editor-in-Chief, Fast Company

### **Infrastructure**

Build the foundation for the future, while managing costs to speed progress

### **Application development and delivery**

Accelerate application development, innovation, and delivery

### **Automation and management**

Automate infrastructure and applications so you can do more without sacrificing stability

### **Artificial intelligence (AI)**

Develop and deliver innovative AI solutions across environments, from single servers to distributed platforms.

## Flexible and Efficient Inference

- ▶ GA distributed inference (llm-d)
- ▶ New validated and optimized models
- ▶ vLLM enhancements
- ▶ LLM Compressor GA

## Connecting Models to Data

- ▶ Modular and extensible approach for: data ingestion, synthetic data generation, tuning, evaluations.
- ▶ RAG enhancements & partner integrations
- ▶ Continual Post Training Algorithm
- ▶ Feature Store GA

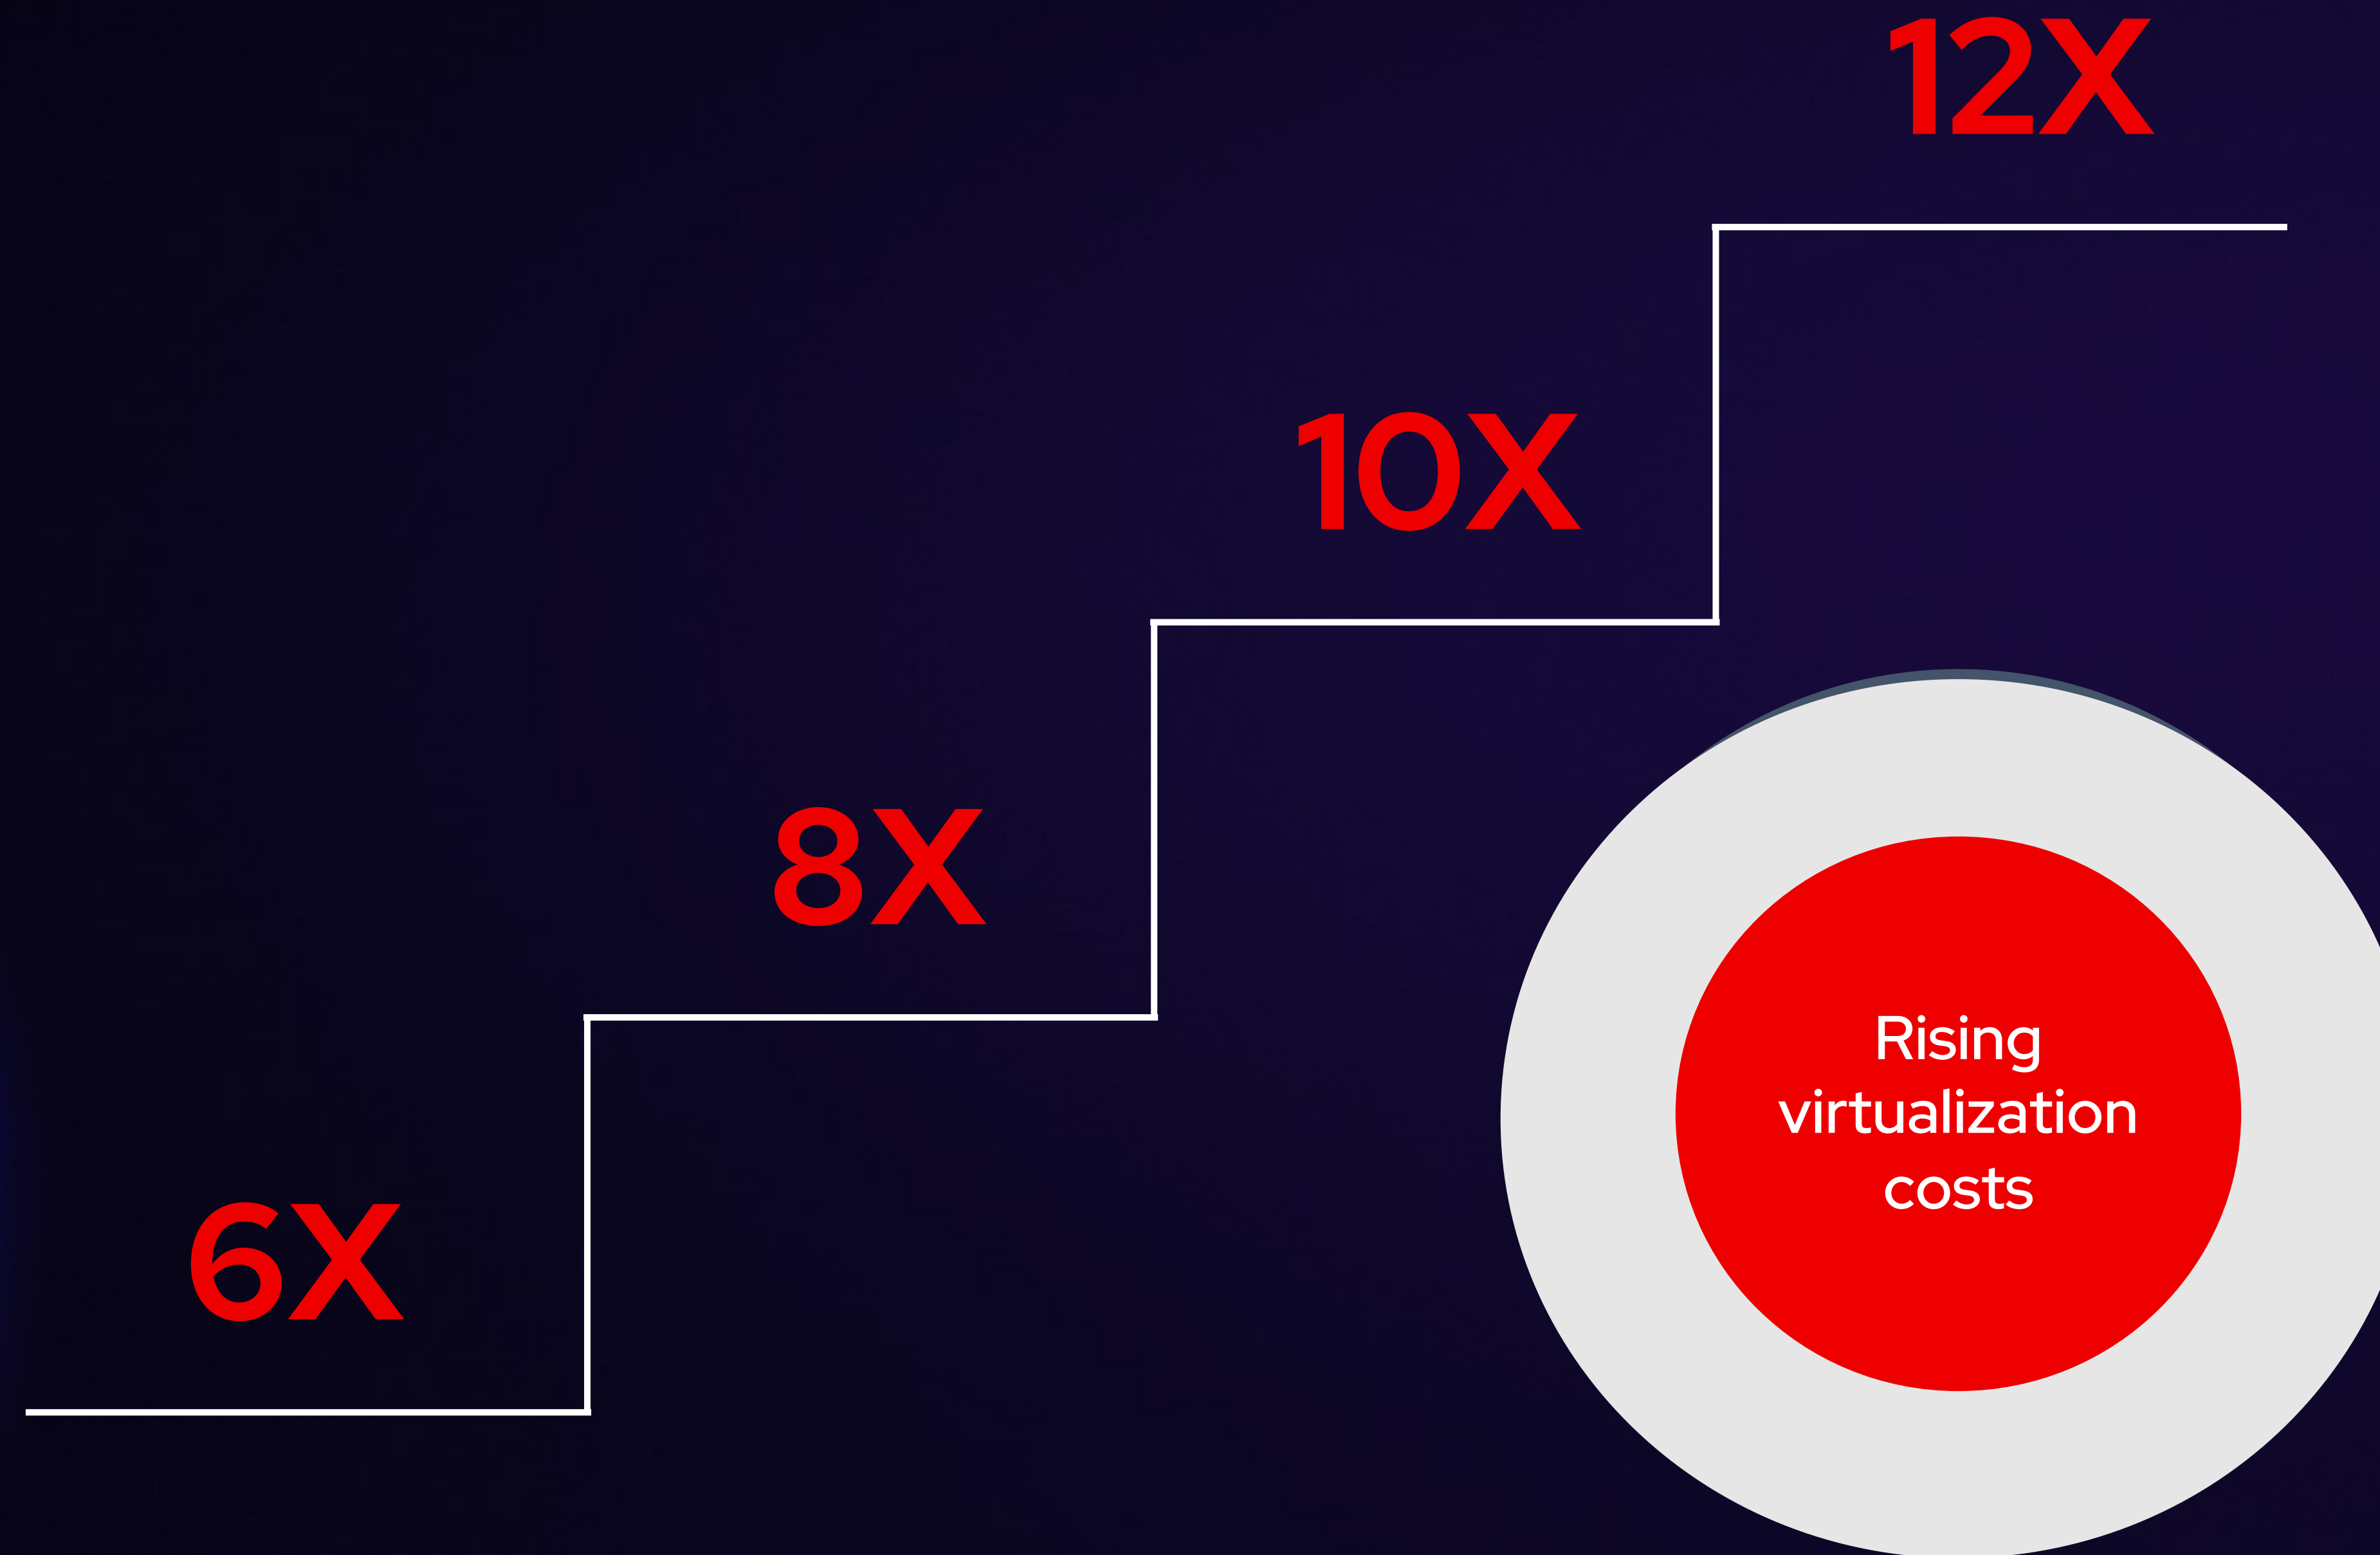

## Agentic AI

- ▶ AI experiences: AI hub and gen AI studio
- ▶ Model Context Protocol support & MCP Server access in gen AI studio
- ▶ Llama Stack API integration

## AI Platform

- ▶ Model catalog and registry GA
- ▶ Model as a Service provider enhancements and API Mgt integration
- ▶ GPU as a Service enhancements

**Single platform to run any model, on any accelerator, on any cloud**

# Virtualization with Red Hat OpenShift

## Proven virtualization technology

Provides an open, secure and scalable platform for seamless migration

## Partnering for success

Partners with leading ISVs and GSIs, delivering comprehensive, tailored solutions and expert guidance

## Strategic migration to a future-proof platform

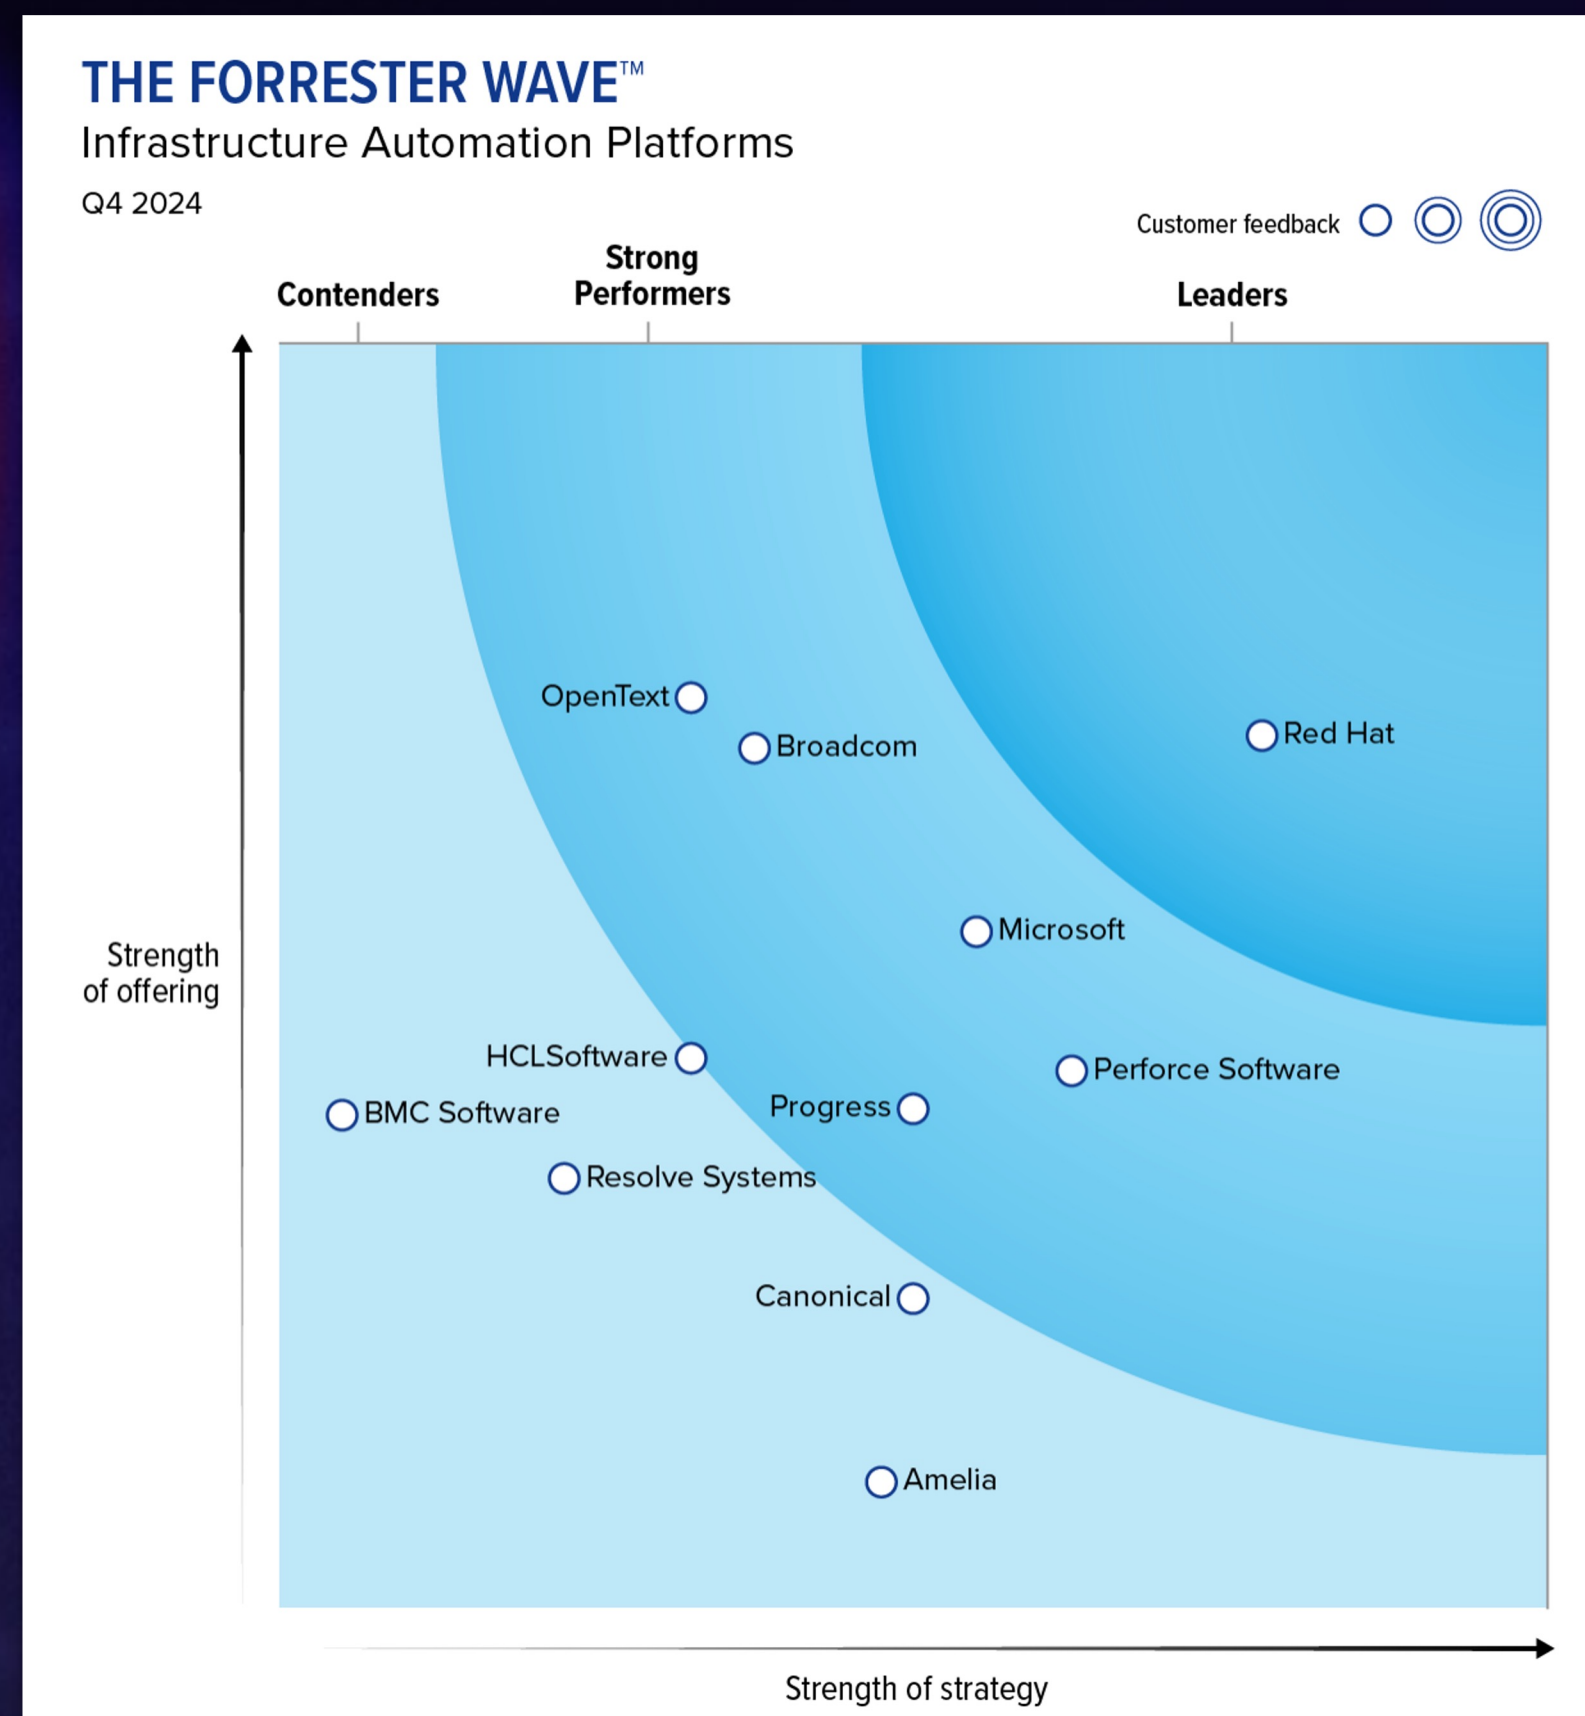

Enables strategic, automated migration to a flexible, cloud-native platform

## Customer momentum

Global customer base that trusts OpenShift to deliver performance, efficiency, and support for business-critical environments

# Red Hat is *the leader* in the 2024 Forrester Wave™ : Infrastructure Automation Platforms

## Key takeaways from vendor profile

- > “The Ansible Automation Platform is a comprehensive solution for various use cases, expanding into event-driven automation to reduce human intervention and reduce the burden of writing code for each scenario.”
- > “Red Hat’s strategy for a collective and inclusive user community is spurring growth. Its vision and partner ecosystem are both strengths...supported by the community, Red Hat Ansible addresses numerous automation use cases.”
- > “Red Hat offers a good all-around automation tool for organizations that aim to enable users to develop mature automation and integrate technology silos.”
