El Futuro de AIOps.

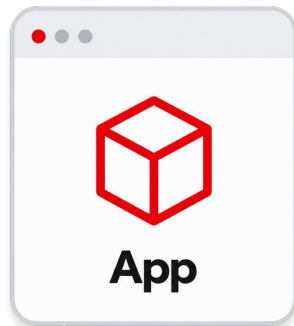

Control total y autorrecuperación
desde tu canal de operaciones

Rafael Minguillon Sanchez
Ecosystem Solution Architect

Carlos López Bartolomé
Senior Specialist Adoption Architect

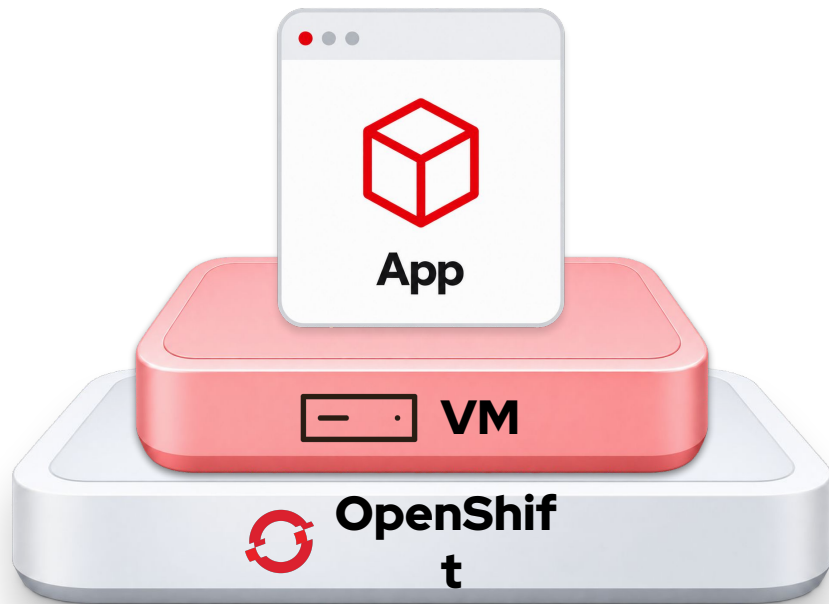

We have a **business need** to solve.

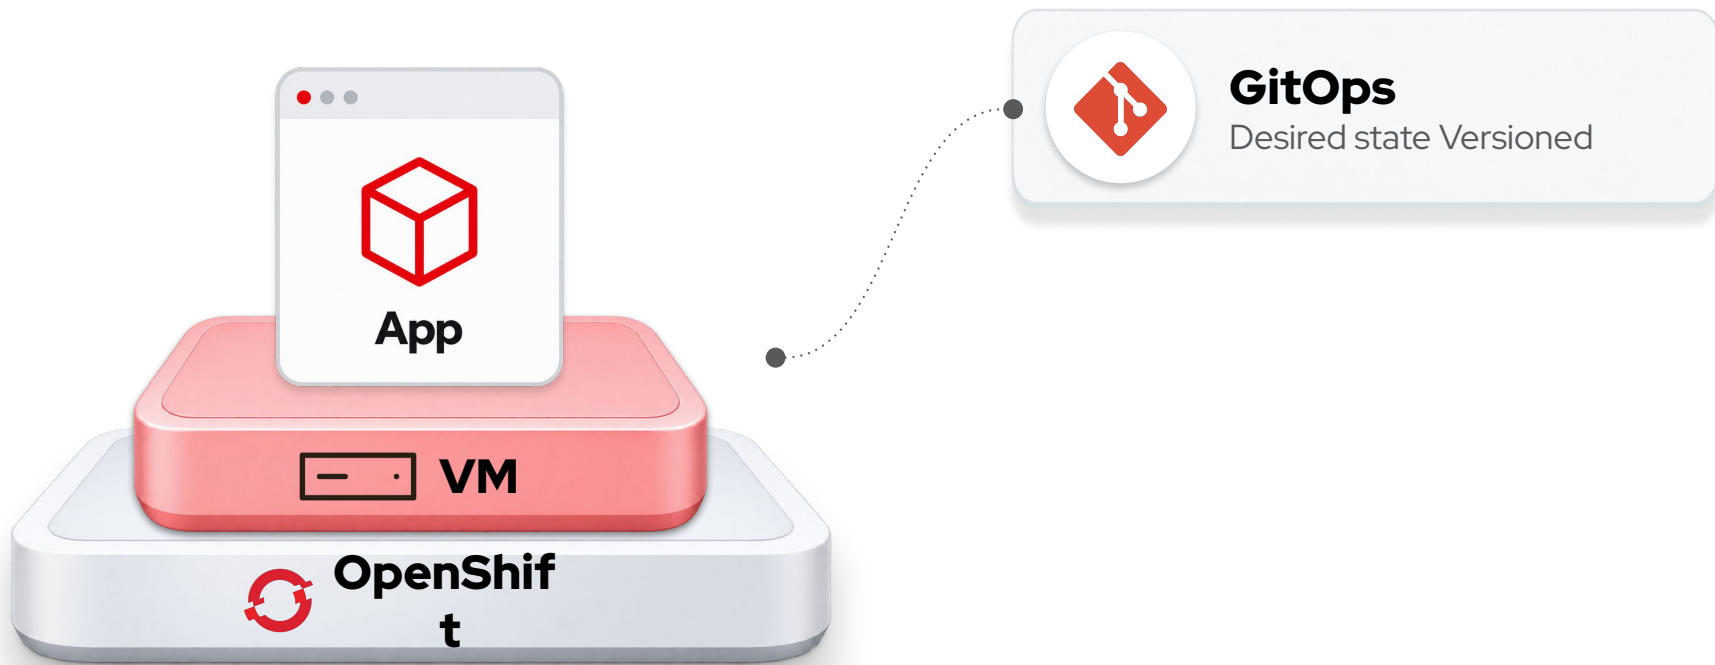

That application needs a **virtual machine**.

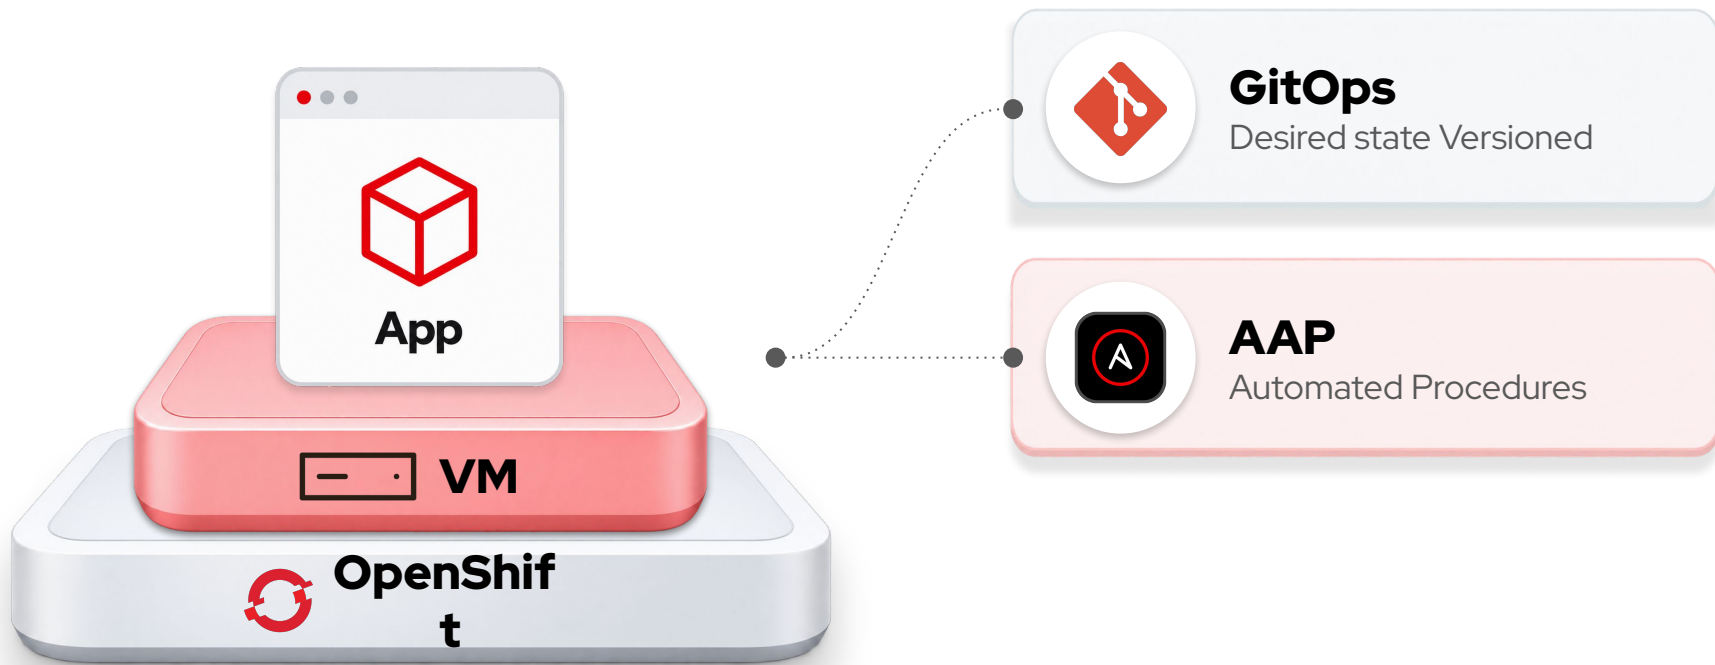

We need a **platform** to host and operate it.

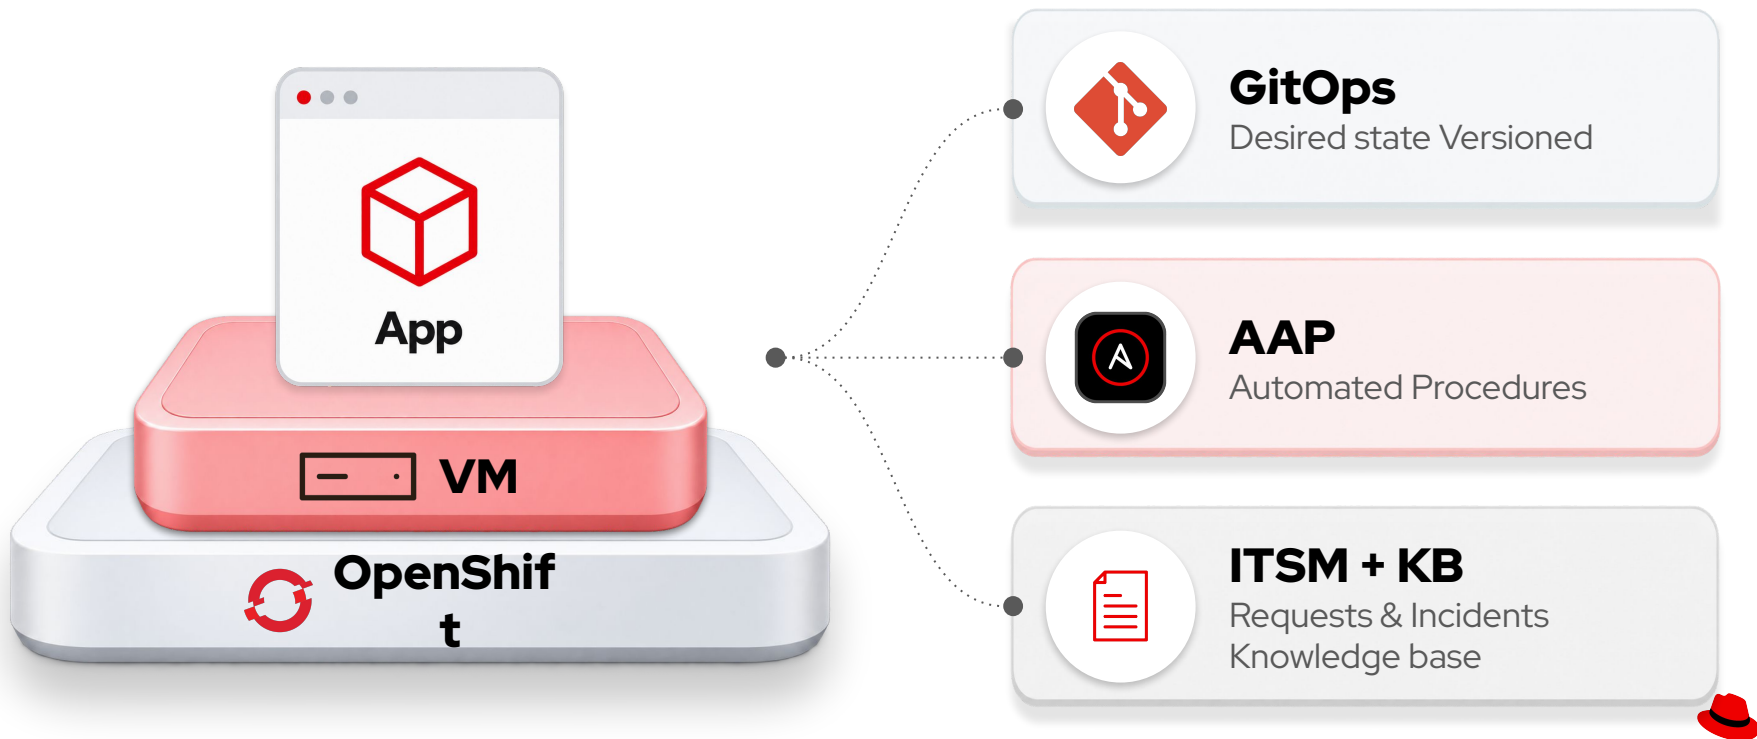

We want **consistency** in how is defined and deployed.

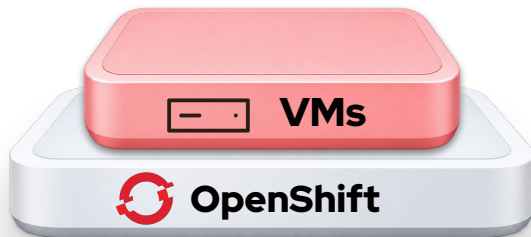

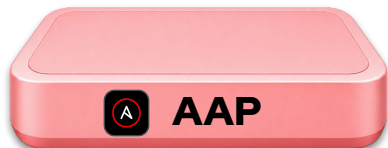

We need **automation** to make operations repeatable.

We need **governance** around every operation.

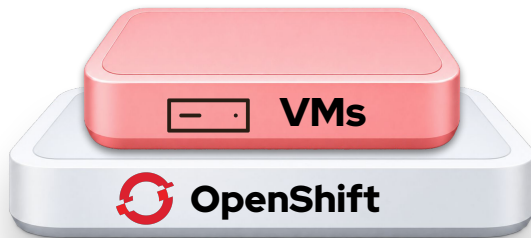

Nothing new here.

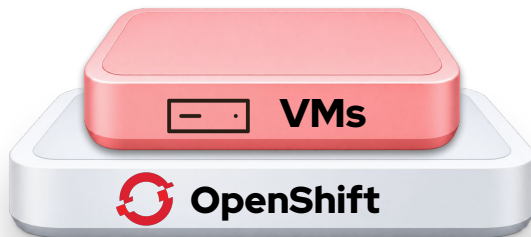

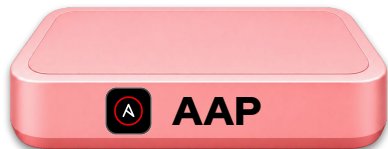

The challenge is operational, not technological.

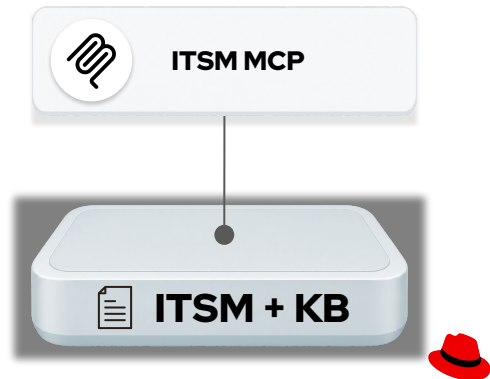

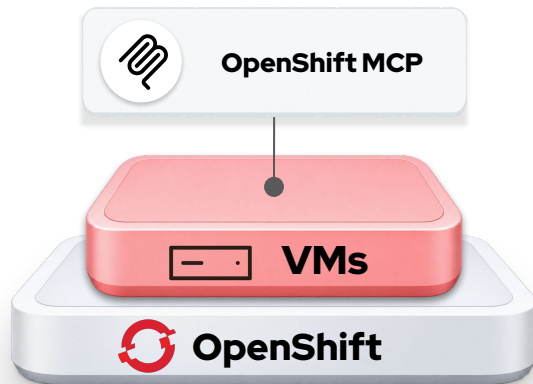

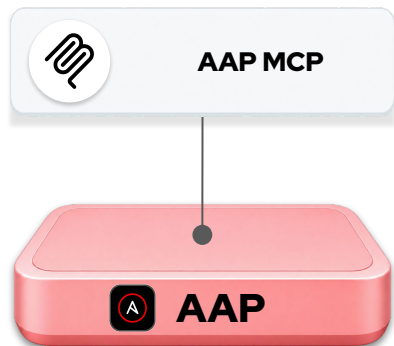

Fragmented access
Scattered knowledge
Heavy context switching
Tribal knowledge
Manual orchestration
Documentation drift
Slow onboarding
Limited end-to-end visibility

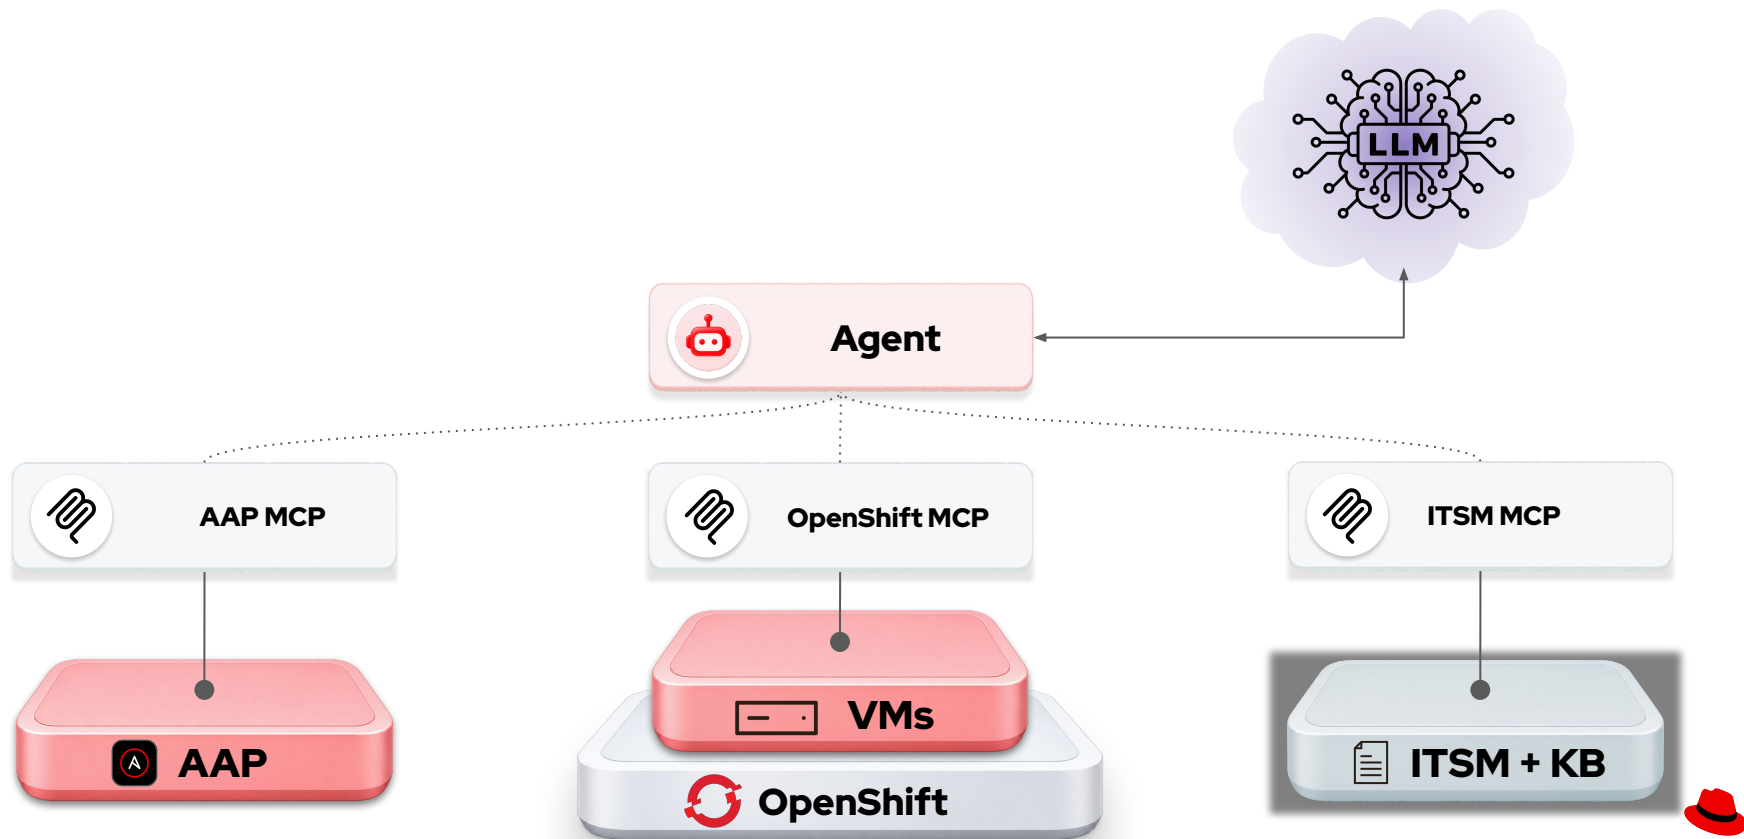

Same stack... one **new way** to operate it.

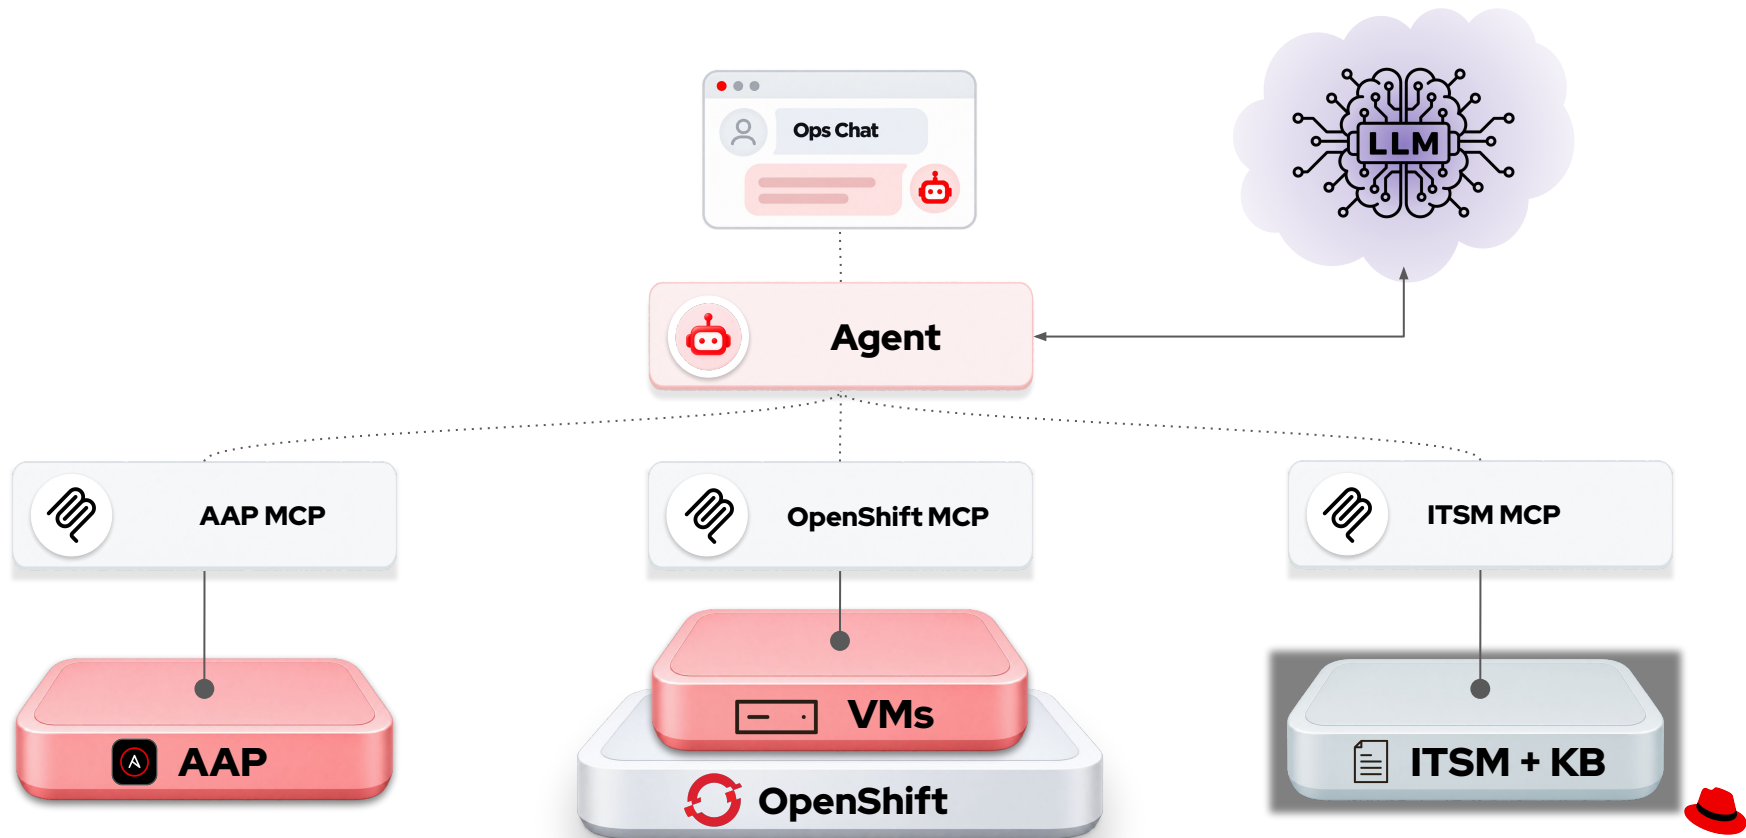

Same stack... one **new way** to operate it.

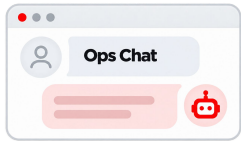

Same stack... one **new way** to operate it.

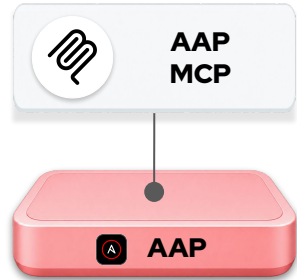

Same stack... one **new way** to operate it.
